*Modeling the Ecorche Human Figure in Clay* NETRA BAHADUR KHATTRI 2021-06-19 This book is meant for those people or artists, Sculptors, Painters, or Students studying human anatomy or Fine Art. As a Sculptor, Netra Khattri has made this book with the language of Art (Sculpture), how muscles attach to the human skeleton, and from where the muscle originates and inserts with muscle function. Initially, Netra Khattri thought of human muscles as sculptures, beginning to end with skeletons, partial muscled figures, and the origin and function of muscular structures. For example, the reader can look at the skeleton to see how the bones and muscles are constructed in this process of evolution and metamorphosis. Nevertheless, there are more interesting facts in human anatomy than here. The difference between this book shows the Ecorche sculpting process is finished anatomical references rather than, other anatomy book shows drawings of muscles attach with bone and structures of human anatomy.

**80,000 Hours** BENJAMIN J. TODD 2016-12-10 Find a fulfilling career that tackles the world's most pressing problems, using this guide based on five years of research alongside academics at Oxford. You have about 80,000 hours in your career: 40 hours a week, 50 weeks a year, for 40 years. This means your choice of career is one of the most important decisions you'll ever make. Make the right choices, and you can help solve some of the world's most pressing problems, as well as have a more rewarding, interesting life. For such an important decision, however, there's surprisingly little good advice out there. Most career advice focuses on things like how to write a CV, and much of the rest is just (misleading) platitudes like "follow your passion". Most people we speak to don't even use career advice - they just speak to friends and try to figure it out for themselves. When it comes to helping others with your career the advice usually assumes you need to work as a teacher, doctor, charity worker, and so on, even though these paths might not be a good fit for you, and were not what the highest-impact people in history did. This guide is based on five years of research conducted alongside academics at the University of Oxford. It aims to help you find a career you enjoy, you're good at, and that tackles the world's most pressing problems. It covers topics like: 1. What makes for a dream job, and why "follow your passion" can be misleading. 2. Why the most effective ways to make a difference aren't always the obvious ones like working at a charity, or becoming a doctor. 3. How to compare global problems, like climate change and education, in terms of their scale and urgency. 4. How to discover and develop your strengths. It's also full of practical tips and tools. You'll come away with a plan to use your 80,000 hours in a way that's fulfilling and high impact. What people are saying "Based on evidence and good sense, not platitudes" - STEVEN PINKER, New York Times bestselling author JOHNSTONE FAMILY Professor of Psychology at Harvard University. "This incredible group is helping people have a greater social impact with their careers." - Sue Desmond-Hellmann, CEO of the Bill and Melinda Gates Foundation. "Every college grad should read this" - Tim Urban, creator of Wait But Why. Read more online This book is based on the free guide you can find on the 80,000 Hours website, where you can find many more articles and our most up-to-date content. All profits from the book are used to fund 80,000 Hours, expanding our research and enabling us to reach more people. About the authors 80,000 Hours is an independent non-profit founded in Oxford in 2011. It performs research into career choice, and provides online and in-person advice. Benjamin Todd is the CEO and co-founder of 80,000 Hours. He grew the organization from a student society at Oxford to a non-profit that's raised \$1.3m in donations, and has 100,000 monthly readers. He has a Master's degree in Physics and Philosophy from Oxford, and speaks Chinese, badly. Ben is advised by the rest of the 80,000 Hours team, including Professor Will MacAskill, author of Doing Good Better, co-founder of the Effective Altruism movement, and one of the youngest tenured professors of philosophy in the world.

IOAN SHALEV 2015-02-11 Oxytocin (OT) and arginine vasopressin (AVP) are the paramount social hormones in mammals and accumulating evidence also modulations of social stress, in-group ¶ out-group relationships and social communications. Recent molecular genetic studies of the oxytocin (OXTR), arginine vasopressin 1a (AVPR1a) and arginine vasopressin 1b (AVPR1b) receptors have strengthened the role of these two neuropeptides in a range of normal and pathological human behaviors. Importantly, dysfunctions in the OT and AVP neural pathways are likely contributing to deficits in social skills and communication in disorders such as autism. This research topic covers the state of the science and provides a deep view of social hormone research in humans to illustrates how pharmacological, genetic and neuroimaging strategies can be successfully combined toward unraveling the mystery of how human social behavior is regulated. Understanding human social behavior at the molecular level, ie. social neuroscience, is not only crucial for treatment and diagnosis of disorders characterized by deficits in social cognition but also has important implications in establishing the congruence of findings from different approaches in the Social Sciences and Biology. We bring together in this issue a broad spectrum of investigators from the neurosciences, genetics, psychology, economics and political science towards a deeper understanding of the biological roots of human social behavior. We hope that this transdisciplinary research topic will bring new insights and ideas to the field, give future perspectives while also addressing open questions and limitation in order to develop intervention and prevention strategies. **A Curious Absence of Chickens** Sophie Grigson 2021-07-08 'Sophie Grigson has written twenty odd excellent cookbooks, but I think this is the best of them. It is her first book for a decade and was obviously driven by a real love of her subjects, which are Puglia, people and food. It is witty, informative, fascinating and stuffed full of recipes you want to cook.' Prue Leith 'Puglia is a region I wanted to get to know intimately, to understand culture, life, history and geography, reflecting through the prism of the food that's put on the tables of locals and tourists, too. I'm reminded of my 20-year old self, scribbling in notebooks as I first travelled through Italy's south, only this time I'm back to stay.' After her children grew up and left home, Sophie Grigson found herself living alone. About to turn 60, she took the decision to sell or give away most of her belongings, to pack up her car and to drive to Puglia on her own to start a new life. In a part of Italy where she didn't know anyone, having last visited the region 40 years ago, this narrative book of food writing, stories and recipes brings to life the region, its food and the local characters that she meets along the way. This is a book about courage, hope, new horizons and, above all, delicious food. 'Vivid, humorous and unsentimental, Sophie's portrait of modern Puglia, still steeped in old ways, is a delicious treat' Xanthe Clay 'OMFG! This beautiful book is transporting me there. I can't put it down. And the lack of chickens...I never bloody noticed!' Matt Tebbutt

**The Black Dress** Deborah Moggach 2021-07-22 Pru is on her own. But then, so are plenty of other people. And while the loneliness can be overwhelming, surely she'll find a party somewhere? 'She really is the Nora Ephron of North London' Claire Chambers, author of Small Pleasures Pru's husband has walked out, leaving her alone to contemplate her future. She's missing not so much him, but the life they once had - nestling up like spoons in the cutlery drawer as they sleep. Now there's just a dip on one side of the bed and no-one to fill it. In a daze, Pru goes off to a friend's funeral. Usual old hymns, words of praise and a eulogy but...it doesn't sound like the friend Pru knew. She's gone to the wrong service. Everyone was very welcoming, it was more excitement than she's had for ages. So she buys a little black dress in a charity shop and thinks, now I'm all set, why not go to another? I mean, people don't want to make a scene at a funeral, do they? No-one will challenge her - and what harm can it do? 'I love clever books that make me laugh. Deborah Moggach, queen of social comedy, is on top form. Superb!' Cathy Rentzenbrink, author of The Last Act of Love and Everyone is Still Alive 'Full of warmth and humour, as well as blistering truths' Daily Mirror
