The Tempting of Thomas Carrick

Stephanie Laurens 2015-02-24 Do you believe in fate? Do you believe in passion? What happens when fate and passion collide? Do you believe in love? What happens when fate, passion, and love combine? This. This... #1 New York Times bestselling author Stephanie Laurens returns to Scotland with a tale of two lovers irrevocably linked by destiny and passion. Thomas Carrick is a gentleman driven to control all aspects of his life. As the wealthy owner of Carrick Enterprises, located in bustling Glasgow, he is one of that city's most eligible bachelors and fully intends to select an appropriate wife from the many young ladies paraded before him. He wants to take that necessary next step along his self-determined path, yet no young lady captures his eye, much less his attention...not in the way Lucilla Cynster had, and still did, even though she lives miles away. For over two years, Thomas has avoided his clan's estate because it borders Lucilla's home, but disturbing reports from his clansmen force him to return to the countryside—only to discover that his uncle, the laird, is ailing, a clan family is

desperately ill, and the clan-healer is unconscious and dying. Duty to the clan leaves Thomas no choice but to seek help from the last woman he wants to face. Strong-willed and passionate, Lucilla has been waiting—increasingly impatiently—for Thomas to return and claim his rightful place by her side. She knows he is hers—her fated lover, husband, protector, and mate. He is the only man for her, just as she is his one true love. And, at last, he's back. Even though his returning wasn't on her account, Lucilla is willing to seize whatever chance Fate hands her. Thomas can never forget Lucilla, much less the connection that seethes between them, but to marry her would mean embracing a life he's adamant he does not want. Lucilla sees that Thomas has yet to accept the inevitability of their union and, despite all, he can refuse her and walk away. But how can he ignore a bond such as theirs—one so much stronger than reason? Despite several unnerving attacks mounted against them, despite the uncertainty racking his clan, Lucilla remains as determined as only a Cynster can be to fight for the future she knows can be theirs—and while she cannot command him, she has powerful

enticements she's willing to wield in the cause of tempting Thomas Carrick. A neo-Gothic tale of passionate romance laced with mystery, set in the uplands of southwestern Scotland. A Cynster Second Generation Novel – a classic historical romance of 122,000 words. Praise for the works of Stephanie Laurens "Stephanie Laurens' heroines are marvelous tributes to Georgette Heyer: feisty and strong." Cathy Kelly "Stephanie Laurens never fails to entertain and charm her readers with vibrant plots, snappy dialogue, and unforgettable characters." Historical Romance Reviews "Stephanie Laurens plays into readers' fantasies like a master and claims their hearts time and again." Romantic Times Magazine

Interference in Elections Kristina Lyn Heitkamp 2018-12-15 Allegations of Russian meddling in the 2016 presidential election have brought the issue of election interference to the fore, but is it actually a significant issue in the United States? This volume explores the history of election interference in the United States and beyond, as well as the various methods of interference. It also discusses whether interference can be effectively combatted and what attempts are being made to do so. Election interference has been declared a threat to the electoral process and democracy as a whole, and it is more important than ever to understand the various factors at play.

Metal-containing and Metallosupramolecular Polymers and Materials Ulrich Schubert 2006 The last few years have brought a dramatic boom in the area of metal-containing systems and materials, both in supramolecular and polymer chemistry as well as nanoscience. Besides synthetic advances, a major increase in knowledge regarding

metallopolymer characterization has been apparent. Moreover, recently a growing interest in the application of these materials can be seen. Potential applications are identified in the areas of smart or intelligent materials, systems with special photochemical and photophysical properties (such as LEDs or solar cells), nanoscience, sensory materials, as well as materials with very special thermal and mechanical properties. This symposium series book covers the complete range of metal-containing polymers and materials by first-hand articles from the world-leading groups. These include design, synthesis, characterization as well as selected applications.

Universities for a New World Deryck M. Schreuder 2013-10-03 *Universities for a New World* takes the Centenary of the 'Association of Commonwealth Universities' (ACU) as its point of departure in exploring what a 2009 'United Nations Educational, Scientific and Cultural Organization' (UNESCO) Report has evocatively termed an 'academic revolution' in modern higher education. The book succinctly explores the rise of the ACU as the world's oldest network of universities, before focussing primarily on that protean 'revolution' in higher education provision - with a particular sampling of the diverse Commonwealth experience across the globe. Gains as well as losses are analysed through critical and interrelated essays. Transformation may have been inevitable, but progress towards

greater participation rates has not always been manifested through quality provision for students or societies at large. Measuring those changes to universities is inherently challenging as transformations are still proceeding apace. The volume accordingly concludes with informed perspectives on the potential future(s) of universities in the 21st century. Paradoxically, further change is now the only constant for higher education in an era of globalisation.

Gómez-Peña Unplugged Guillermo Gómez-Peña 2020-12-31 *Gómez-Peña Unplugged* is an anthology of recent and rewritten classic writings from Guillermo Gómez-Peña, a figure who stands alone as unique and groundbreaking in the history of performance art and as the artistic

director of transdisciplinary performance troupe La Pocha Nostra. Throughout this collection, Gómez-Peña tackles literature, theory, pedagogy, activism and live art in an eclectic mix that demonstrates how the process of writing is simultaneously a performative exercise in embodied language. The writing stands as a call for action, utilizing what Gómez-Peña terms “imaginary activism” and “radical citizenship”; it invites the reader to embrace a borderless, polygendered, crossgenerational and race-literate ethos. This timely anthology comes straight from the heart of a troubled Trump-era United States and a crime cartel-ridden Mexico. Artists and writers are prompted to engage in radical performance pedagogy within the civic realm and to think of themselves as public intellectuals and “artists” participating in the great debates of our times. By encouraging emerging artists and writers to wildly imagine their practice beyond the normative art world and academia, this book is a fundamental read for scholars and students of performance art, political theatre, cultural studies, literature, poetry, activism and race and gender politics. Performance Art, Live or Time-Based Art, Cultural Studies, Experimental Poetry, Multiculturalism, Social Practice, Chicano/Latino/Border Art & Literature, Relational Aesthetics, Public Art, Artivism, Activism, Psychomagic Ritual, Literary Studies, Anthropology, Sociology, Ethnic & Gender Studies, Queer & Women Studies, Post-Colonial Theory, Techno-Art, Cyborgian Studies, Exoticized & Fetishized Identities, Deconstruction Stereotypes & Binaries, Anti-Essentialism, Anti-Nationalism, Radical Citizenship, Anti-Racism, Race & Gender Literacy

Researching the Social Economy Jack

Quarter 2010 In this volume, contributors representing an inter-regional and international network of scholars and community organizations analyse how the social economy, in its many manifestations, interacts with and shares characteristics of organizations in the other sectors of the economy. The first study of its kind, *Researching the Social Economy* enriches our understanding of how this important cluster of organizations contributes to Canadian society in both economic and social terms, and lays the groundwork for future study. Laurie Mook is an assistant professor in the School of Community Resources and Development at the University of Arizona. Jack Quarter is a professor and co-director of the Social Economy Centre at the Ontario Institute for Studies in Education, University of Toronto. Sherida Ryan is the co-ordinator of the Community University Research Alliance on Social Business for Marginalized Social Groups at the Ontario Institute for Studies in Education, University of Toronto.

Violence and Mental Health Jutta Lindert 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the

mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international--and intranational--level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Law and Economics of Public Procurement Reforms Gustavo Piga 2017-10-03 Appropriate laws and

regulations are essential tools to direct the action of procurers toward the public good and avoid corruption and misallocation of resources. Common laws and regulations across regions, nations and continents potentially allow for the further opening of markets and ventures to newcomers and new ideas to satisfy public demand. Law and Economics of Public Procurement Reforms collects the original contributions related to the new European Union Directives approved in 2014 by the EU Parliament. They are of both economists and lawyers, and have been presented in a manner that allows for exchanges of views and "real time" interaction. This book features, for each section, an introductory exchange between two experts of different disciplines, made up of a series of sequential interactions between an economist and a lawyer, which enriches the liveliness of the debate and improve the mutual understanding between the two professions. Four sections characterize this book: Supporting social considerations via public procurement; Green public procurement; Innovation through innovative partnerships; and Lots - The Economic and Legal Challenges of Centralized Procurement. These themes have current relevance of the new European Public Procurement Directives. Written by an impressive array of experts in their respected fields, this volume is of great importance to practitioners who work in the field of EU public procurement in the Member States of the EU, as well as academics and students who study public finance, public policy and regulation.

The Dragon and the Elephant National Research Council 2010-03-25 The return of the once-dormant economies of China and India to dynamism and growth is one of the most remarkable

stories in recent history. The two countries are home to nearly 40 percent of the world's population, but until recently neither had played an influential role in the contemporary global economy. In the past two decades, China and India have liberalized internal economic policy, treatment of foreign investment, and trade, and have experienced economic growth at sustained high rates. From the point of view of the United States, however, the most important development in the Chinese and Indian economies in the long term may be the strides they are making in developing their own domestic innovation capacities. After a long period of underinvestment, both countries have committed to growing their science and education systems to bolster research and further economic expansion. Some observers of the recent growth have said that both countries are surging in their efforts to spur innovation; others have emphasized the potential of one country over the other; and still others have suggested that both China and India have a long way to go before achieving innovation-driven growth. With such a range of views, The National Academies set out to describe developments in both countries, in relation to each other and the rest of the world, by organizing a conference in Washington, D.C. The conference, summarized in this volume, discussed recent changes at both the macroeconomic level and also in selected industries, and explored the causes and implications of those changes.

Sport, Civil Liberties and Human Rights Richard Giulianotti 2014-01-02 What is the relationship between sport and human rights? Can sport protect and enhance the human rights of competitors and sport workers? Can

it also undermine those rights? These topical issues are among the many that are explored in this groundbreaking volume which analyzes how sports both contribute to, and undermine the human rights of participants, spectators and workers. The papers are written by esteemed academics whose work is at the cutting-edge of this burgeoning area of study. Experts from around the world have contributed to this important work, and examine controversial issues such as: * sexual harassment * racism * freedom of movement * sport as popular protest. This book was previously published as a special issue of Sport in Society.

Freedom Annelien De Dijn 2020 Many Americans assume that the country was founded by skeptics of "big government," who saw minimal state power as freedom's prerequisite. Annelien de Dijn takes on this myth. In fact, this was the view not of the eighteenth- and nineteenth-century revolutionaries who created modern democracies, but of their critics and opponents.

Learning with Information Systems Simon Bell 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Fatal Accusation Marie Force
2021-10-15 A deadly serious affair... The story breaks as Metro PD lieutenant Sam Holland attends a dinner party with her husband, Vice President Nick Cappuano: President Nelson is accused of having an affair. More shocking still, campaign staffer Tara Weber claims the president fathered her newborn son—while the First Lady was undergoing secret cancer treatment. When a high-profile murder case hits Sam's desk, she's shocked to uncover a connection to the presidential scandal. With the department caught up in its own internal scandals, and the chief's job hanging by a thread, Sam questions who she can trust as her team uncovers information that clouds an already-murky case. And with calls for the president to resign getting louder by the minute, Sam needs to close this case before she finds herself living at 1600 Pennsylvania Avenue.
